(a)
Downstream gap (mean ± SD, finite runs)
fully_connected/none: finite outcome in 4 of 10 seeds
110.3%
Mean downstream gap (%)
line
ring
fully_connected
(b)
Distributional spread
Mean entropy ratio
(c)
Support diversity
Mean unique exact-K supports
(d)
Diversity versus quality (one point per seed)
line/none
line/by_pairs
ring/none
ring/by_pairs
fully_connected/none
fully_connected/by_pairs
Gap (%)
Unique exact-K supports (per seed)
normalization
none
by_pairs
